

OUTBREAK

Humanity is on the brink of extinction. An unprecedented four epidemics have spread across the world and appear unstoppable. The United Nations have assembled a team of medical experts, scientists, and rescuers from across the world at Central Disease Control to fight for human survival.

In **Outbreak** players must travel across the world to treat patients, halt the epidemic, and ultimately find the cure for the deadly disease under time and resource constraint. They must work together to problem solve on the spot, communicate who needs to do what, and utilize their special talent to help protect the world.

Suitable for developing skills in : Respecting and Appreciating, Diversity, Teamwork, Problem Solving, Resource Management

Duration : 2.5 hours
